About Me

Education

B.Sc. Behavioral Neuroscience, UBC

M.A. Cognitive Science, UBC

Ph.D. Behavioral Science/Cognitive Science, UBC
(expected 2022)

Web: <https://yuluo.psych.ubc.ca/>

Collaborators:

THE UNIVERSITY
OF BRITISH COLUMBIA

Environment and
Climate Change Canada

CONTENT

01

Case 1

Providing immediate feedback to improve sorting accuracy in student residences

02

Case 2

Implementing pictorial warnings to reduce plastic waste

03

Case 3 (in progress)

Using carbon labels to promote low-carbon food choices

04

Theoretical work

Conducting a meta-analysis to examine the efficacy of behavioral interventions

Case 1

Providing immediate feedback
improves recycling and composting
accuracy (Luo et al., 2019)

Collaborator:

UBC Sustainability Team

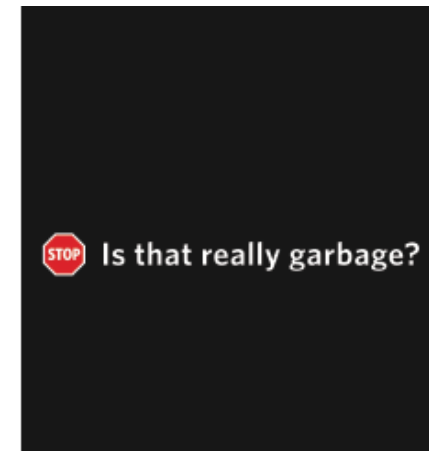

Problem

How can we
prevent recycling
contamination?

Solution - Feedback

Wrong!
This should go to Garbage

Field Experiment Design

Game Building

Control Building

Timeline

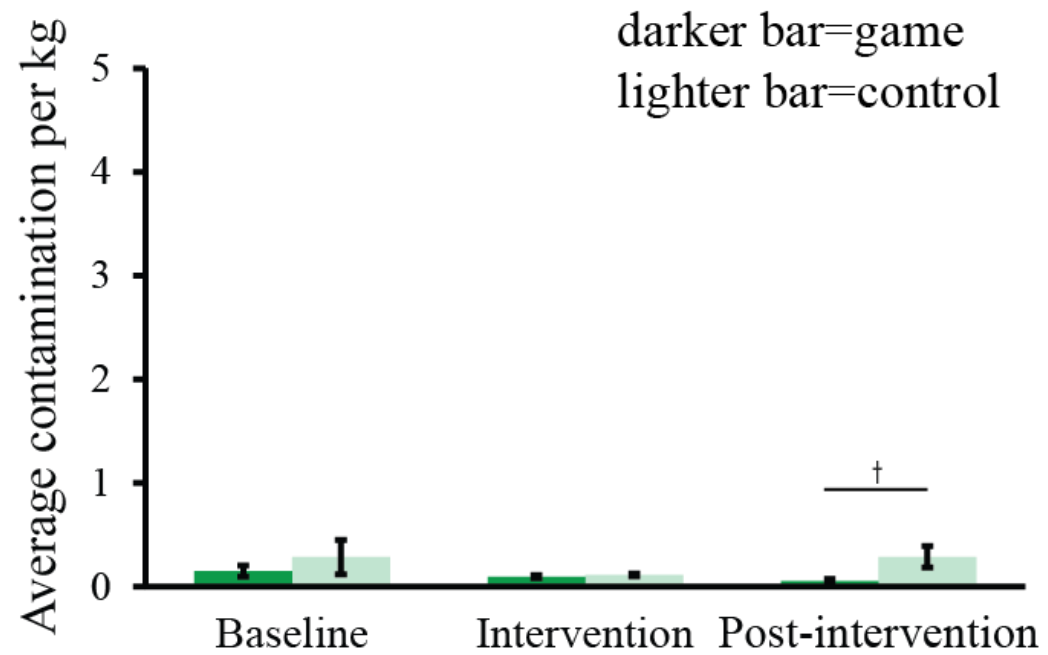

Baseline

Intervention

Post-
intervention

Results

Game building < Control building

Case 2

Reducing plastic waste by visualizing
marine consequences (Luo et al., under
review)

Collaborators:

KPMG Vancouver

Ocean Wise Conservation Association

Problem

**POLLUTED BY
SINGLE-USE PLASTIC**

**How can we keep plastics
out of our ocean?**

Solution – Pictorial Warnings

Field Experiment Design

Control

Signage only

Animal

Pledge

Field Experiment Design

Timeline

Baseline

Intervention

Post-intervention

Results

Animal condition showed the largest decline from baseline to intervention

Follow-up

Impact

Case 3

Using climate-friendly food label to promote low-carbon food purchasing (in progress)

Collaborators:

UBC SEEDS Program
UBC Food Services

Problem

How can we
promote low-carbon
food choices?

Solution – Carbon Labels

Most climate friendly. The best option!

Somewhat climate friendly. A good option.

Least climate friendly. Less good option.

Field Experiment Design

AL PESTO		13.5
<i>Pesto, prosciutto cotto, mozzarella, gorgonzola, artichokes and pickled tomato</i>		
PESTO POLLO		13.5
<i>Pesto, roasted chicken, mozzarella, artichokes and pickled mushroom</i>		
MARGHERITA		12.5
<i>Classic tomato, basil and bocconcini</i>		
VEGAN FEATURE	VEGAN	12.5

Planned Analysis

July-August
2020

VS

July-August
2021

Potential Impact

Theoretical Work

A meta-analytic cognitive framework of
nudge and sludge (Luo, Soman, & Zhao,
under review)

04

Problem

How are cognitive processes involved in behavioral interventions?

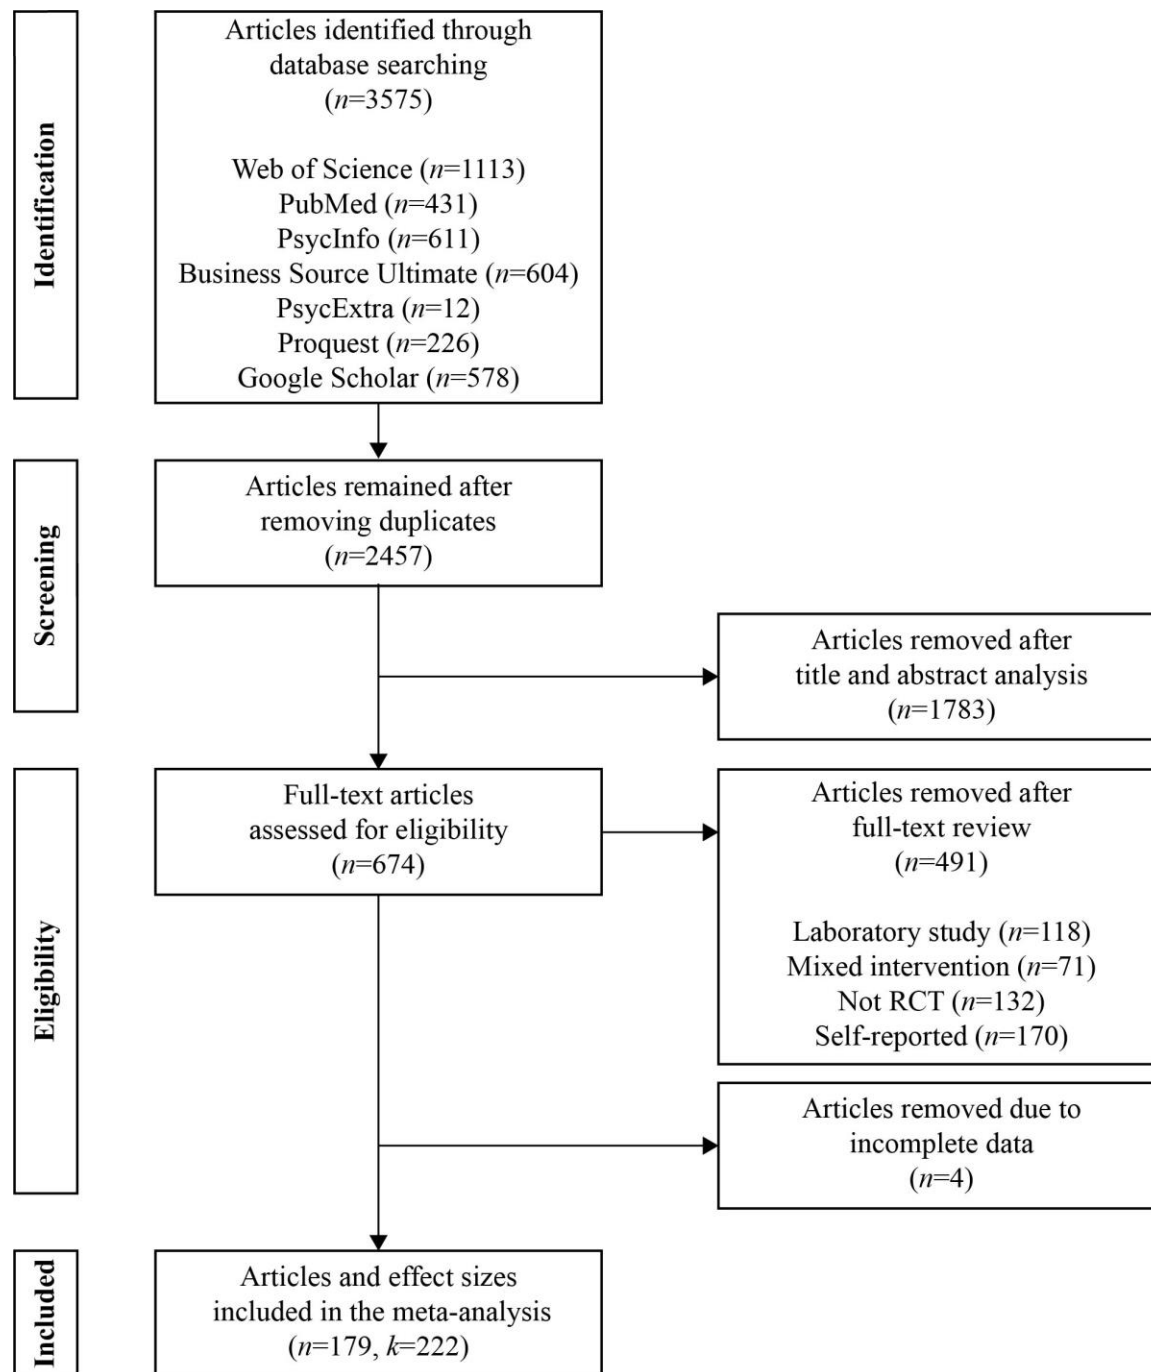

Definitions

Attention	Using bottom-up features (e.g., color, size) to increase or decrease the salience of an option
Perception	Framing the content of information to influence the conscious interpretation of the information
Memory	Using encoding cues or retrieval cues to alter behaviors
Effort	Changing cognitive or physical ease associated with an option
Intrinsic motivation	Influencing one's inherent interests toward an option in the absence of external factors
Extrinsic motivation	Imposing external rewards or punishments to alter behaviors

Examples

Cognitive Processes	Interventions
Attention	Highlighting with red color
Perception	Benefit framing
Memory	Reminder (e.g., promoting college enrollment)
Effort	Auto-enrollment plan, defaults
Intrinsic motivation	Social norm (e.g., promoting donation)
Extrinsic motivation	Financial incentives

Meta-analysis

Results

Effort-based interventions are the most effective

THANK YOU!
